

UMA Info Android application

The UMA Info Android application is an android application built to provide easy access to information about the Medan Area University. The UMA Info Android application is expected to be able to provide the latest information about the Medan Area University campus activities.

The existence of a campus profile and quick access through the UMA Android Info Application really helps facilitate students and lecturers in the teaching and learning process and makes it easier for the academic service process, such as opening the Academic Online Center (AOC), Student and Lecturer Emails, and E-Learning.

The Android UMA Info application can be downloaded via the Google Play Store for all smartphone users with an Android System Operator (OS).

Hopefully this application can make it easier for students of Medan Area University and keep updating information about Medan Area University.

Come on, download the application immediately and give a review, positive suggestions on the Google Play store with keywords: UMA Info.
