

**UMA CARE PROGRAM THROUGH CHANCELLOR PROVIDES BASIC FOOD ASSISTANCE TO STUDENTS DUE TO COVID VIRUS OUTBREAK 19**

University of Medan Area Chancellor Prof. Dr. Dadan Ramdan, M.Eng, M.Sc, along with the Vice Chancellor for Student Affairs Muazzul SH, M.Hum, and the Head of the BARKI University of Medan Area provided food assistance to students who could not return to campus because of the *Covid* outbreak 19.

The Chancellor of Medan Area University together with the Vice Chancellor for Student Affairs of UMA and the Head of BARKI visited 2 points of existence of student housing (Kost) locations that could not go home on campus related to the 19th Covid virus outbreak. These 7 Faculty of Agriculture students get help from UMA.

They were very grateful because UMA had cared for students who could not return to the village because of the Covid epidemic 19. The Rector of Medan Area University also motivated and encouraged students to study harder to produce innovative graduates and graduate on time.

The gratitude from the students of the Faculty of Agriculture, agrotechnology study program Ahmad F. Berimbing gave a big thank you to UMA for giving us food that made us enough to eat all seven of us in the contract house (boarding).

Furthermore, the Chancellor and the Vice Chancellor and the Head of BARKI UMA continued their journey to the second point of the rented location of the students who were on fishing lines, with UMA students gladly welcoming the Chancellor and his staff in providing food aid to students.

This time the students who were visited were very happy and proud. The Rector of UMA came to the rented house (boarding house) in surprise because the pride of food was given very much. According to Kori Isabella Hutabarat, a student of the Faculty of Engineering, study of informatics engineering, that this assistance was very much compared to other campuses.

This time the Chancellor and the Vice Chancellor for UMA Student Affairs gave motivation and enthusiasm to students to be more active in achieving achievements and graduating on time. Hopefully the assistance provided should be even more active in learning about the knowledge of this 19th Covid outbreak.
